

SILVER OAK UNIVERSITY
Silver Oak College of Computer Application
Bachelor Of Computer Application
Course Name: Major Project
Course Code: 2040233393
Semester: 6

Prerequisite: Software Engineering, Programming / Coding language, RDBMS

Course Objective: To solve industrial (or society or research) problems, to plan, schedule, and monitor the software project, development, coding, and testing of a large project cohesively and documentation of the project.

Teaching Scheme:

Teaching Scheme		
L	T P Contact Hours	Credits
0	0 40 40	20

Guidelines for Project:

- ☐ It is suggested to develop Web applications using emerging Web frameworks like LARAVEL, DJANGO, ASP.NET, XAMARIN, Spring or ecommerce etc.
- ☐ It is recommended that the team should be about 2-3 students.
- ☐ The project should be free from plagiarism of any kind.\
- ☐ Internal guides (i.e. The regular faculty members) must be allocated to projects.
- ☐ Project plan along with the division of work amongst teammates would have been prepared and got approved within a maximum of 5 days of the start of the project.
- ☐ Coding standards should be followed meticulously. At the minimum, the code should be self-documented, modular, and should use the meaningful naming convention.
- ☐ It is advisable that object-oriented methodology is used with the reusability of classes and code, etc.
- ☐ The output reports must include MIS reports, if applicable.
- ☐ The documentation should include a chapter on “Learning during Project Work”, i.e. “Experience of Journey during Project Duration”.
- ☐ It is strongly recommended that Data structure/Database design is included in the report. At least portions of code (preferably full code) are mandatory. The student may be asked to write the code related to the project during the examination.
- ☐ If a student is compelled to follow certain instructions (by the external, i.e. organization’s Guide) which he/she does not agree to, such a student must prepare a supplementary report to document his/her version and present it to the examiners if such a need arises.
- ☐ Internal guides (i.e. The regular faculty members) must devote the time allocated as per the timetable to guide the students for the project. The time allocation will be in accordance with the scheme for the 6th semester project as given.
- ☐ Internal guides should preferably visit external guide to track the project
- ☐ Project documents should be printed on both sides of paper.

Accomplishments of the student after completing the course:

- ☐ Doing the project will enable the student to go through rich experience in developing large projects. Such an experience will include encountering various technical issues, finding sources to resolve the issues and finally finding the solution of all these issues satisfactorily.
- ☐ Thinking analytically, analyzing, and synthesizing requirements and complicated information for getting a good comprehension of the solution methodology to be adopted.
- ☐ Ability to document and write well.
- ☐ Organizing the time effectively .
- ☐ Working with teammates and generating substantial output of the efforts.
- ☐ It will prepare the students for analyzing and programming for industrial problem and large projects work in future.

Documentation:

- ☐ The project has to be well-documented in the form of a Project Report (at least 40 pages comprising of the design, data dictionary, source code, screenshots, etc.).
- ☐ Format: Print out on both the side of page with single line spacing. Use Times New Roman size 10 for normal text.

TABLE OF CONTENTS:

1. Introduction
 - 1.1. Existing System
 - 1.2. Need for the New System
 - 1.3. Objective of the New System
 - 1.4. Problem Definition
 - 1.5. Core Components
 - 1.6. Project Profile
 - 1.7. Assumptions and Constraints
 - 1.8. Advantages and Limitations of the Proposed System
2. Requirement Determination & Analysis
 - 2.1. Requirement Determination
 - 2.2. Targeted Users
3. System Design
 - 3.1. Use Case Diagram
 - 3.2. Class Diagram
 - 3.3. Interaction Diagram
 - 3.4. Activity Diagram
 - 3.5. Data Dictionary
4. Development
 - 4.1. Coding Standards
 - 4.2. Screen Shots
5. Proposed Enhancements
6. Conclusion
7. Bibliography

Course Outcomes:

Sr. No.	CO-Statement
CO-1	Developing a comprehensive software solution demonstrating advanced problem-solving, coding proficiency, and project management skills.
CO-2	Designing, implementing, and presenting an innovative and functional software application, showcasing mastery of relevant technologies and methodologies.
CO-3	Executing a cohesive and innovative project demonstrating advanced understanding and application of relevant concepts, technologies, and methodologies.
CO-4	Completion of a major project demonstrating mastery of theoretical knowledge and practical skills in software development, project management, and problem-solving.

CO-PO-PSO Matrix:

Co. No.	PO 1	PO 2	PO3	PO4	PO5	PO 6	PO7 PO8 PO9 PO10 PO11	PO1 2	PSO 1	PSO2
CO-1	3	2	2	3	3	2	3 3 3 2	2	3	2
CO-2	1	3	3		3	3	2 2 3		2	3
CO-3	2	2	3	3	3		3 1 1 3	3	3	3
CO-4	3	2	3	2	2	3	3 3	2		3
